app cam solo PRO 2K

100% WIREFREE 2K SUPER HD SPOTLIGHT SECURITY CAMERA

100% Wire-Free over WiFi

Free from ugly cables and wiring hassles. No need for base stations.

Solar Power Compatible Connect the optional Solar Panel for non stop power for battery recharging during daylight conditions.

Starlight Colour Night Vision

Starlight CMOS sensor offers clearer night vision, up to 10 metres. With the spotlight built into the camera this adds colour to the night vision footage.

Spotlight and Camera in 1

PIR Motion Activated Spotlight illuminates your way and adds colour to see better in the dark.

Thermo Sense Technology A

smart heat and movement sensor that eliminates any false triggers and ensures you are alerted to real alerts.

2K Super HD

Get crystal clear vision with true 2K Super HD. View live streaming in more detail.

180 Days Operating Time*

Rechargeable Battery Works without being plugged in. Long-lasting on one charge and compatible with the Uniden Solar Panel.

SD Card & Cloud Backup

Micro SD card (not included) for local storage and cloud backup for offsite storage. 7 Days of Cloud Storage is offered with longer paid plans available.

Weatherproof Design (IP65)*

Place the camera outdoors or indoors, without worrying about the weather. Uniden App Cam Solo Pro guards you rain or shine.

120° Wide Viewing Angle

Wider field of vision to cover more of the house.

Smart Intelligent Alerts

Get instant app push notifications, email and siren alerts when danger happens.

Customised Voice-Recordable Alerts

Broadcast a personalised voice alert when motion is detected.

Siren Alert Trigger

A siren is built into the camera to deter unwanted visitors.

Two-Way Talk

Listen to what's going on and talk back through the built-in mic and speaker.

Motion Detection Record

Save motion events on micro SD card (not included) or Uniden Cloud for later playback.

Privacy Masking

Black out areas within the camera's view that you don't want to be recorded.

Low-Battery Notifications

Informs you when battery capacity reaches 10%.

Rapid Wake-Up

Wake-up at once when you view live streaming, or when motion events are detected.

Innovative Installation Design

Bracket and other accessories help it blend into any placement.

SPS02
(3.2w Output power)

SOLAR PANEL

Connect the optional Solar Panel to the App Cam Solo Pro to receive non stop power for your battery, allowing it to recharge during daylight conditions. Easily position the weatherproof* solar panel to maximise sunlight exposure†.

SPS01
(2.5w Output power)

All packs available with and without solar panel.

QUAD PACK

Some jurisdictions and authorities may regulate the use of surveillance products. It is the buyers responsibility to ensure they comply with the appropriate regulations when using this product. Specifications Subject to Change Without Notice. See Uniden Website for any changes. uniden.com.au * IP65 Weatherproof is defined as no ingress of dust; complete protection against contact (dust tight) and Water projected in jets (6.3mm nozzle) against the enclosure of the camera from any direction shall have no harmful effects. # WiFi range (Distance) is all dependent on your router's capability, which will affect your network coverage. If you need to extend your network coverage many third party range extenders are available that improve distance and eliminate black spots. Range Performance is affected by factors such as: full brick walls, tin roofs & large or multi-story houses. ^Both smartphone/tablet and the camera will require internet connection for this feature to work. † Minimum Network Bandwidth Requirements: For optimal performance of the smartphone app we advise a minimum network bandwidth of 4Mbps for 2k (1440P) live stream, 2Mbps for FHD (1080P) live stream and 0.8Mbps for 512P live stream. If these bandwidth requirements are not met the live stream may not connect and will not be viewable on your smartphone. Motion Detection: Motion detection can be triggered by the PIR sensor in the camera. The PIR sensor only detects objects with heat up to 10 metres away and in the line of sight. At night, or in darkness, monitor motion detection sensitivity is not as effective as in daylight hours, as it relies on night vision capabilities. Δ Subscription needs to be renewed every month. ϕ Based on Full Capacity Rechargeable Lithium Battery with one (1) detection a day only.
